(231) 689-7213 | SteffaniC@newaygocountymi.gov

Dear Hess Lake Resident,

You are receiving this letter to inform you of a new pilot incentive program. This program will help protect and improve the overall health and water quality of Hess Lake. As stewards of Hess Lake, our goal is to preserve and enhance the lake's ecological balance for it to remain usable, beautiful, and enjoyable for current residents and future generations.

Septic System Pumping Incentive

The Hess Lake Board will offer a **\$100 rebate** to residents who have their septic systems pumped during the pilot program period.

Why Septic Maintenance Matters

Proper septic maintenance helps reduce nutrient runoff that contributes to algae blooms, excessive weed growth, and declining lake health. Small efforts throughout the watershed can collectively make a significant positive impact. This pie chart illustrates that toilets are the largest source of household water use. Algae blooms like the one shown below can be associated with improperly maintained septic systems.

Thank you for helping protect & preserve Hess Lake for future generations.

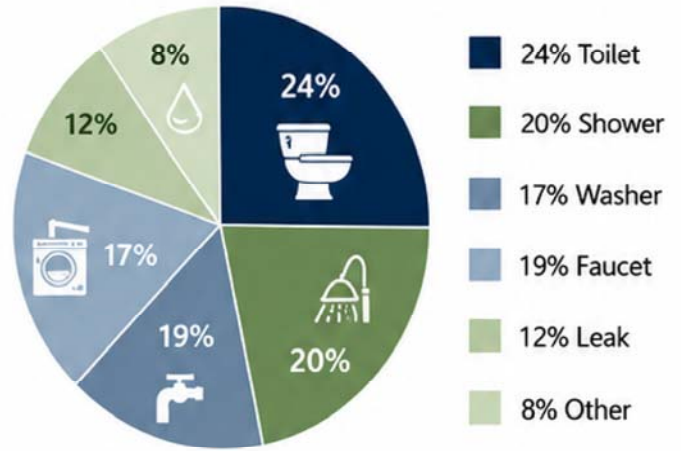

Did You Know?

Properly maintained septic systems can last 30+ years.

Household Water Use

Important Program Details

- Program runs June 1 - September 30, 2026
- \$100 septic pumping rebate available
- Limited to 100 participating residents
- Landowners eligible every other year only

To Receive the Rebate
